Welcome Message - SHOW OWNER

Charles Beauduin
President
CEMATEX

Green. Eco. Sustainable. In recent years, these buzzwords have catapulted to the forefront of many companies' business strategies. Led in part by growing consumer awareness of the social and environmental impacts of the lifestyles they lead and the clothes they wear, sustainability has grown beyond a concept into a genuine movement.

As the world's largest integrated textile and garment manufacturing technologies showcase, ITMA continually strives to provide a global marketplace and networking platform to enable manufacturers to stay ahead of the competition.

At ITMA 2015, the spotlight will be on sustainable solutions throughout the entire value chain; from raw material extraction to textile production, chemical processes to end-of-life management of textiles.

Over 1,600 exhibitors from 47 countries are showcasing their latest technologies and innovations here in Milan, 20 years after ITMA's last appearance in this city. In keeping with the rapidly growing digital printing sector, printing now features as a separate chapter within our Index of Products. The fibre and yarn chapter launched at the last edition of ITMA has also been expanded to include recycled fibres and yarns.

We are delighted that so many industry partners are collaborating with us to make ITMA a vibrant sourcing and meeting place. A comprehensive schedule of knowledge-sharing platforms, such as the 2nd World Textile Summit, Textile Colourant and Chemical Leaders Forum, Nonwovens Forum, and Digital Printing Conference will run alongside the exhibition and provide added opportunities for participants to learn about the latest trends from experts.

On behalf of CEMATEX, I should like to extend my heartiest congratulations to the award winners of the ITMA Sustainable Innovation Award, which was launched as part of our ongoing efforts to encourage and recognise outstanding industry members and post-graduate students for their contributions to the sustainable development of the global textile and garment industry.

Finally, I should like to thank MP Expositions, our partners, supporting associations and media, exhibitors and visitors, and all who have worked tirelessly to ensure that ITMA 2015 is an outstanding success. I wish you all a rewarding participation at ITMA and may we collectively move towards a more sustainable industry.

Welcome Message - ORGANISER

James Chia
Chairman
MP International Pte Ltd

A warm welcome to the 17th edition of ITMA, the world's most established textile and garment exhibition. MP Expositions, a member of the MP International group of companies, is honoured to be appointed by CEMATEX to organise ITMA again, after the successful staging of the 2011 exhibition in Barcelona.

ITMA 2015 is held against a shifting business landscape. Despite the world facing many economic challenges, we are pleased with the overwhelming response which has enabled us to organise a bigger ITMA compared with the 2011 edition. This year's showcase spans over 200,000 square metres of the Fiera Milano exhibition complex. It has attracted over 1,600 exhibitors, an increase of about 20 per cent from the 2011 figure.

ITMA is the place to check out the latest trends, meet key decision makers and establish new contacts from all sectors of the textile and garment manufacturing value chain. In addition, the many onsite educational activities will encourage knowledge transfer, and sharing of ideas and best practices among industry leaders.

We have had the opportunity to work with highly respected industry leaders across the entire textile and garment value chain. We appreciate CEMATEX and its national associations – ACIMIT, AMEC AMTEX, BTMA, GTM, SWISSMEM, SYMATEX, TMAS, UCMTF and VDMA - for their guidance.

We are also grateful to industry and professional associations, media and various partners for their support and contributions which have enabled us to put together this mega exhibition. Last but not least, we would like to express our deep appreciation to our exhibitors and visitors, who have helped ITMA to build its reputation as the world's best marketing and sourcing platform for the textile and garment machinery industry.

We hope everyone who has gathered in Milan for ITMA 2015 will also take some time to enjoy the cosmopolitan city – a fashion capital, and gourmet's and shopper's paradise.

On behalf of the organising team, I wish everyone a successful show. See you at the next ITMA!

The Role of CEMATEX

- To promote and strengthen the textile machinery industry of its member associations
- To preserve the role of ITMA as the world's premier exhibition of textile machinery. Exhibition policy is the core business of CEMATEX, and as the owner of the ITMA shows in Europe and Asia, it aims at a reasonable exhibition cycle and concentration on a very limited number of exhibitions in the interest of its members and to the benefit of their customers
- To represent the European textile machinery industry vis-à-vis the EU and its bodies by:
 - making itself known as a stakeholder in the textile machinery industry
 - keeping regular contacts with key EU officials
 - monitoring and influencing regulations in the field of industrial policy and other fields relevant for the textile machinery industry
- To take the lead for the creation of a 'World Forum of Textile Technology'
- To follow an open and responsive communication policy towards the EU and other official bodies, specialised media, scientists, economists and other individuals as well as towards other organisations
- To be open to cooperation with other associations in the textile machinery, engineering and textile industries and other organisations pursuing similar objectives

CEMATEX Member Associations

The following nine national European textile machinery associations are members of CEMATEX. They are the stakeholders and service partners of their members. Some of the key activities covered by these nine associations on behalf of their members include exhibition policy, EU legislation, standardisation, advice on technical related matters, international marketing and promotion.
